

Collaborative PPM for cloud computing

DreamTeam is powered by Microsoft's Azure cloud, providing our customers with the most reliable and scalable PPM suite available for cloud computing. DreamTeam's advanced capabilities in project and portfolio management include:

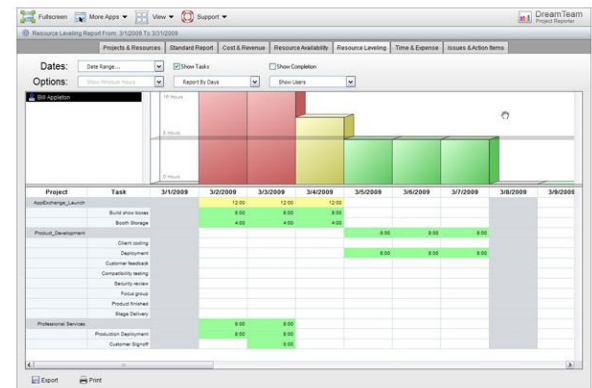

Enterprise project & portfolio management

The DreamTeam Project Manager offers enterprise grade project management. It's highly visual approach is ideal for professionals that require advanced project features including: Rich Gantt charts, timesheets, expense reporting, resource allocation, advanced portfolio reporting and a host of other best-in-class capabilities. With Microsoft Project import, DreamTeam enables you to easily migrate projects to collaborative spaces in the cloud.

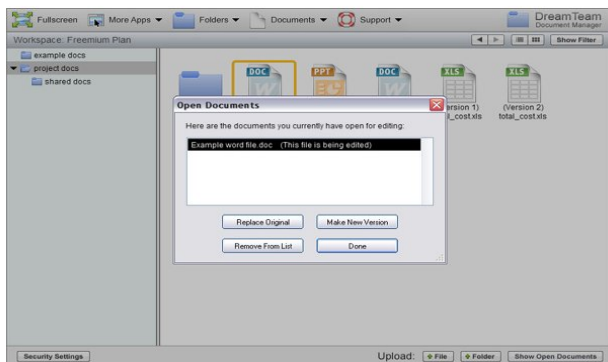

Project contributor cockpit

Our project calendar provides a contributor's cockpit and includes a time sheet editor, task manager, risk and highlight monitors, and a host of other rich capabilities that help your team optimize and prioritize their day.

Portfolio reporting

DreamTeam offers a 360 degree view of your projects and includes an advanced reporting module for capacity planning, resource management, time & expense reporting and advanced project reporting across your portfolio.

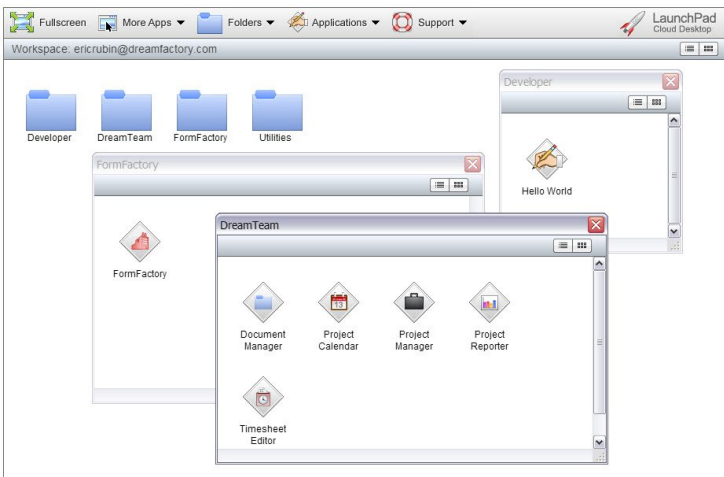

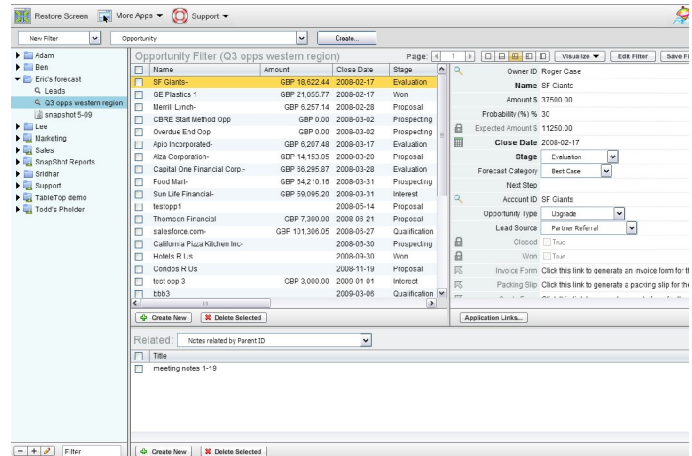

Enterprise document collaboration

DreamTeam's Document Manager allows users to store and share documents with colleagues and partners securely in the cloud. It offers a "WebTop" for managing and launching virtual documents in a familiar desktop paradigm. Capabilities include versioning, desktop sync, and double click launch of virtual files using desktop applications.

Collaborative performance tracking

DreamTeam's TableTop offers a simple way to create on-the-fly data managers with configurable summary & detail views, rich visualization, spreadsheet style calculations, and trend analysis. Track project related data together in Force.com's flexible database, versus using rigid and disconnected Office files. (e.g. create collaborative data managers to track product feature requests , issues & bugs, downstream requirements, etc.)

TableTop's excel loader allows you to instantly transform flat files into shared cloud databases.

Embeddable Portals

Embed our LaunchPad portal into your website and launch our entire SaaS suite from your web pages.

LaunchPad combines a desktop metaphor with web portals enabling custom cloudtops to interact with your partner ecosystem.

Partner Branding

Our LaunchPad Login Panel has a white label option to incorporate your brand in to our embeddable widget.

Extend your brand and drive traffic to your site as you collaborate with partners.
