

Turn your website into a SaaS destination

Integrate your brand with DreamFactory's teamware for Azure™. Simply add our free LaunchPad partner widget to any web page and allow users to launch our robust SaaS applications from your website.

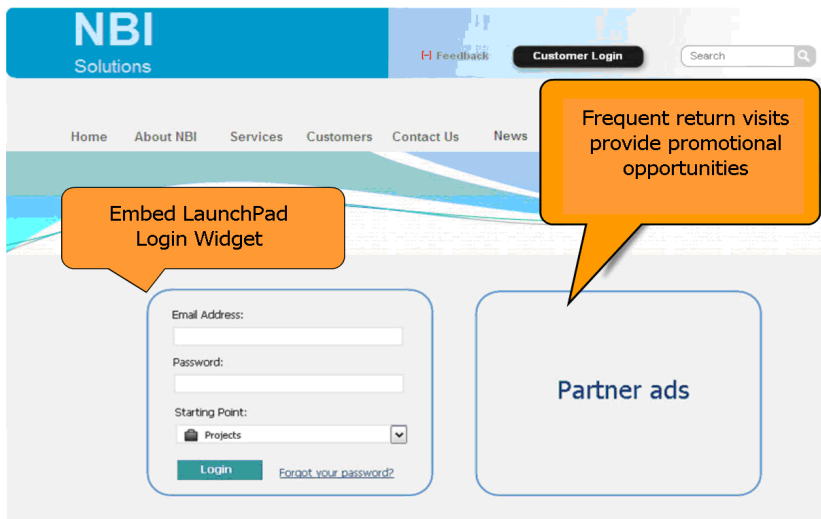

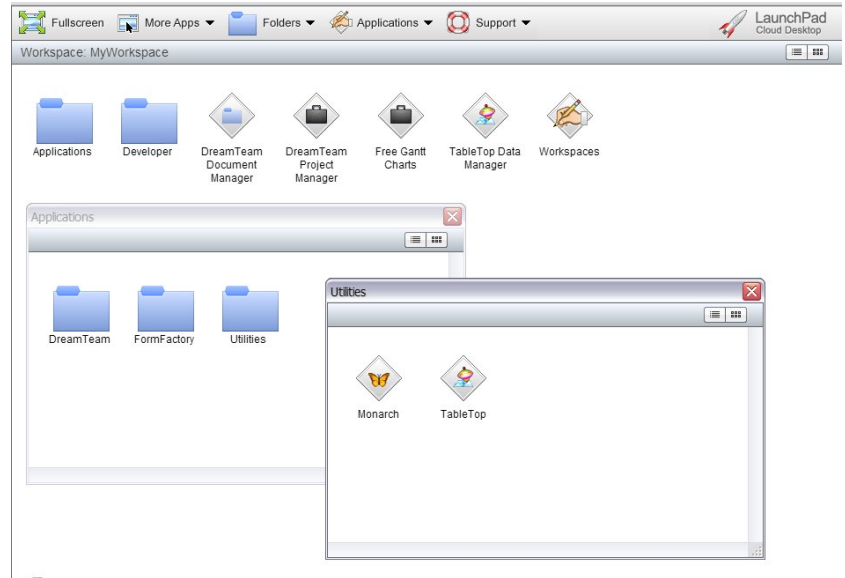

Promote SaaS on Azure and get closer to your customer, everyday.

Get in the SaaS game instantly by adding LaunchPad to your website.

Launch our free Project Management application, free trials, and paid SaaS products from your website to develop registered subscribers.

Wrap our powerful applications with your brand and dramatically increase the frequency of visits to your site.

Get the best SaaS margins by exploiting Azures low cost structure and DreamFactory's partner friendly architecture.

Maintain a direct relationship with your customers

Why send your hard-earned customers to someone else's website? With our Velocity VAR and Referral programs your customers will spend more time on your site leveraging free and subscription based SaaS apps.

Our VAR program even enables partners to brand the in-product experience with configurable menus to highlight your unique support and training services.

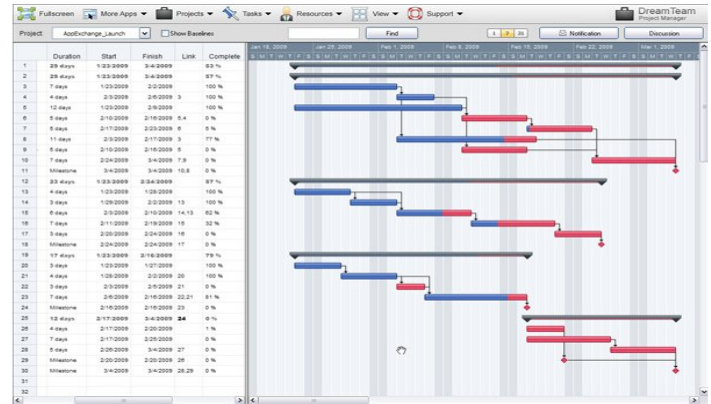

Program Features:

- Great partner margins
- Free Project Management app
- Partner branding
- Self-service trials & upsells from partner website

LaunchPad Apps

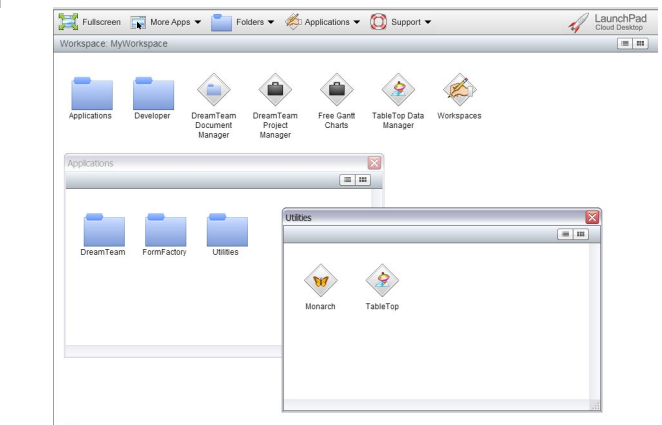

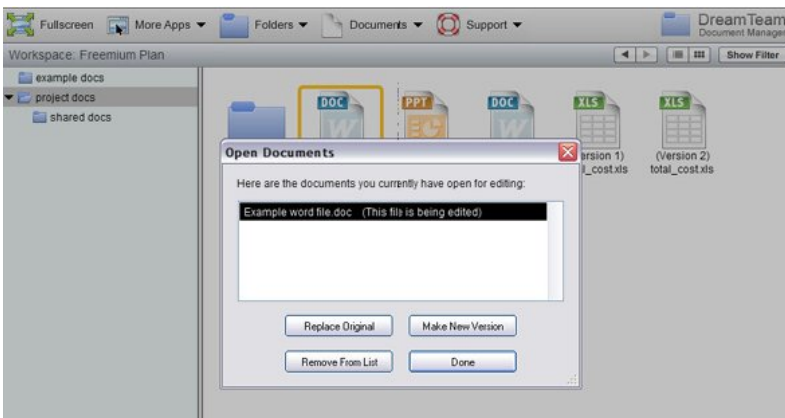

Project & Portfolio Management

The DreamTeam Project Manager offers enterprise grade project management for Azure. It's highly visual approach is ideal for professionals that require advanced project features including: Rich Gantt charts, timesheets, expense reporting, resource allocation, advanced portfolio reporting and a host of other best-in-class capabilities. With Microsoft Project import, DreamTeam enables you to easily migrate projects to collaborative LaunchPad Workspaces.

Enterprise document collaboration

DreamTeam's Document Manager allows users to store and share documents securely in LaunchPad Workspaces. Manage and launch documents in a familiar desktop paradigm. Capabilities include versioning, desktop sync, and double click launch of virtual files using desktop applications.

LaunchPad Workspaces

Create shared workspaces on-the-fly in the Azure cloud. Instantly invite users and assign privileges with no provisioning required. Create unique application views for each workspace with customizable Cloudtops.

Data Mover

Move cloud master data and metadata into LaunchPad Workspaces for aggregation and manipulation. Data records and related object records can be moved in a single push through an intuitive step-by-step process.

Source cloud databases include Force.com, Amazon, Cisco Connect, and Intuit Partner Platform.
